

Index.html

This HTML document appears to be the code for a website, presumably related to a jewellery store called "Tanishq." Let's break down the structure and purpose of different sections in the code:

1. Metadata Section:

- It includes meta tags for character set, viewport settings, and mobile compatibility.
- Favicon and basic meta information like keywords, description, and author are provided.

2. Title and Stylesheets:

- The title of the website is set to "Tanishq."
- External stylesheets (CSS files) for Bootstrap, Font Awesome, and custom styles are linked.

3. Header Section:

- The header contains the website's navigation bar with links to different sections like Home, About, Shop, and Blog.

4. Slider Section:

- A section for a slider with a background image and a title promoting the "Best Jewellery Collection."

5. Shop Section:

- Displays a grid of products with images, names (e.g., Necklace, Ring), prices, and a "New" label.

6. About Section:

- Introduces the website with an image and a brief description.

7. Offer Section:

- Includes three boxes with images and text offering discounts ("Up to 15% Off," "Up to 10% Off," "Up to 20% Off").

8. Blog Section:

- Features two blog posts with images, dates, titles, and excerpts.

9. Client Section:

- Displays client testimonials in a carousel format with images, names, and comments.

10. Info Section:

- Contains a form for subscribing via email and links to social media.
- Provides links to different sections (Home, About, Shop, Blog).

- Includes Instagram images, a brief "About Us" description, and contact information.

11. Footer Section:

- Displays a copyright statement and a link to "Titan Company India."

12. Script Tags:

- Links to jQuery, Bootstrap, and a custom JavaScript file.

In summary, this HTML document represents a basic structure for a jewellery store website with sections for navigation, product display, about information, blog posts, client testimonials, and contact details. The styling is handled by Bootstrap and custom CSS, and JavaScript is used for additional functionality.

About.html

This HTML document appears to be the code for an inner page of a website, specifically the "About Us" page for the jewellery store "Tanishq." Here's a description of the main sections:

1. Metadata Section:

- Similar to the previous code, this section includes metadata for character set, viewport settings, and mobile compatibility.

2. Title and Stylesheets:

- The title is set to "Tanishq."
- It links to Bootstrap, Font Awesome, and custom stylesheets for styling the page.

3. Header Section:

- The header section includes navigation with a brand logo and a button to toggle a mobile navigation overlay.

4. About Section:

- This section contains a brief introduction to the company with an image on one side and details on the other.
- A link to "Read More" is provided, presumably leading to a more detailed about page.

5. Info Section:

- This section includes a form for subscribing via email and links to social media.
- It provides links to different sections (Home, About, Shop, Blog).
- Instagram images and a brief "About Us" description are also included.

6.Footer Section:

- The footer contains a copyright statement with a link to "Titan Company India."

7. Script Tags:

- Similar to before, it includes links to jQuery, Bootstrap, and a custom JavaScript file.

In summary, this HTML document represents an inner page specifically designed for the "About Us" section of the Tanishq jewellery store website. It includes information about the company, subscription forms, social media links, and navigation options. The styling is handled by Bootstrap and custom CSS, and JavaScript is used for additional functionality.

Blog.html

This HTML document appears to be the code for an inner page of a website, specifically the "Blog" page for the jewellery store "Tanishq." Here's a description of the main sections:

1. Metadata Section:

- Similar to the previous code, this section includes metadata for character set, viewport settings, and mobile compatibility.

2. Title and Stylesheets:

- The title is set to "Tanishq."
- It links to Bootstrap, Font Awesome, and custom stylesheets for styling the page.

3. Header Section:

- The header section includes navigation with a brand logo and a button to toggle a mobile navigation overlay.

4. Blog Section:

- This section displays the latest blog posts with images, dates, titles, and brief descriptions.
- Each blog post has a "Read More" link, presumably leading to the full blog post.

5. Info Section:

- This section includes a form for subscribing via email and links to social media.
- It provides links to different sections (Home, About, Shop, Blog).
- Instagram images and a brief "About Us" description are also included.

6. Footer Section:

- The footer contains a copyright statement with a link to "Titan Company India."

7. Script Tags:

- Similar to before, it includes links to jQuery, Bootstrap, and a custom JavaScript file.

In summary, this HTML document represents an inner page specifically designed for the "Blog" section of the Tanishq jewellery store website. It includes the latest blog posts with images and dates, a subscription form, social media links, and navigation options. The styling is handled by Bootstrap and custom CSS, and JavaScript is used for additional functionality.

Shop.html

This HTML document represents the code for an inner page of a website, specifically the "Shop" page for the jewellery store "Tanishq." Here's a description of the main sections:

1. Metadata Section:

- Includes metadata for character set, viewport settings, and mobile compatibility.

2. Title and Stylesheets:

- The title is set to "Tanishq."
- It links to Bootstrap, Font Awesome, and custom stylesheets for styling the page.

3. Header Section:

- The header section includes navigation with a brand logo and a button to toggle a mobile navigation overlay.

4. Shop Section:

- Displays the latest products with images, names, prices, and a "New" tag.
- Products are organized in a grid layout, and each product is a clickable link.

5. Info Section:

- Includes a form for subscribing via email and links to social media.
- Provides links to different sections (Home, About, Shop, Blog).
- Instagram images and a brief "About Us" description are also included.

6. Footer Section:

- The footer contains a copyright statement with a link to "Titan Company India."

7. Script Tags:

- Includes links to jQuery, Bootstrap, and a custom JavaScript file.

In summary, this HTML document represents an inner page specifically designed for the "Shop" section of the Tanishq jewellery store website. It includes the latest products with images and prices, a subscription form, social media links, and navigation options. The styling is handled by Bootstrap and custom CSS, and JavaScript is used for additional functionality.

Style.css

It looks like you've provided a SCSS (Sass) code snippet for styling a web page. This code includes variables for color definitions, mixins for styling buttons, and various styling rules for different sections of a webpage such as the header, slider, shop, about, offer, blog, client, info, and footer sections.

Here's a brief summary of what each section does:

1. Variables:

- Defines color variables for white, black, primary colors, and background color.

2. Fonts:

- Imports Google Fonts and defines mixins for the main and secondary fonts.

3. Button Mixins:

- Defines mixins for creating styled buttons with different hover effects.

4. Body Styles:

- Sets the main font, text color, and background color for the body.

5. Padding Mixins:

- Defines mixins for different padding values.

6. Heading Container Styles:

- Styles for heading containers with flex display.

7. Header Section Styles:

- Styles for the header, navigation, and menu button.

8. Slider Section Styles:

- Styles for the slider section, including background images and text.

9. Shop Section Styles:

- Styles for the shop section, including product boxes and buttons.

10. About Section Styles:

- Styles for the about section, including images and text.

11. Offer Section Styles:

- Styles for the offer section, including boxes with images and details.

12. Blog Section Styles:

- Styles for the blog section, including boxes with images and text.

13. Client Section Styles:

- Styles for the client section, including client boxes and carousel controls.

14. Info Section Styles:

- Styles for the info section, including forms, social links, and various other details.

15. Footer Section Styles:

- Styles for the footer section.

It's a comprehensive set of styles for different sections of a website. If you have specific questions or need further clarification on any part of the code, feel free to ask!
